Landing of Space Shuttle Atlantis Rescheduled for 4:55 p.m. Mon.

Landing of the Space Shuttle Atlantis was delayed Sunday due to cloudiness at KSC. Landing has been rescheduled for 4:55 p.m. CDT Monday with a second opportunity available at 6:31 p.m. CDT Monday. The landing will mark completion of the STS-86 Shuttle-Mir Docking mission.

Flu Shots for Civil Service Employees Noon - 2 p.m. Tues. at Medical Center

Safety Shoe Van Here 8 a.m. - 2 p.m. Wed. Southwest End of Bldg. 4471

Marshall Research Provides Earth-Shaking Revelations

Marshall engineer Dr. Mark Whorton is conducting space research which is being used on Earth to reduce the effects of major vibrations -- such as those caused by earthquakes and high winds -- on structures. He is studying ways to resolve the problem of vibrations caused by movements aboard the Space Shuttle that can affect delicate science experiments on board. Findings are being used to develop technological tools on Earth to aid in the design of more earthquake-tolerant structures.

Information Expo Wed. to Feature Latest in Computer Technology

Marshall's Information Technology Expo will be held 10 a.m. - 2 p.m. Wednesday at the Redstone Officers' Club, Bldg. 130. The event will be sponsored by the Information Systems Services Office and will feature more than 25 exhibitors demonstrating the latest computer hardware, software and services. It will be open to Marshall civil service employees and contractors. **Contact:** Linda Medal, 4-0266.
